Submitted Job Details Summary

Company Profile

Tech Corp is an established market leader in cloud computing and data analytics. Established in 2015, we support over 10 million daily active users across global enterprises.

Job Description

We are seeking a senior Python developer to join our backend engineering team. You will build and scale REST APIs, design relational and NoSQL databases, and coordinate with frontend developers. Working environment includes modern CI/CD pipelines.

Requirements

Minimum 5 years of professional backend software development experience. Proficient in Python, Django/FastAPI, PostgreSQL, Docker, and AWS. BS degree in Computer Science or equivalent field.

Benefits

Competitive market salary. Comprehensive medical, dental, and vision insurance. 401(k) retirement matching. Standard paid time off.

Key NLP Predictors Influencing the Result

The following keywords present in the text had the highest statistical influence on the classification model: medical (-1.2220), salary (-1.0020), retirement (+0.9377), developer (-0.9356), established (-0.9292), enterprise (-0.8777), software (-0.8693), proficient (+0.8676), engineering (+0.8295), cloud (-0.8277)
